Chemistry and Physics of LIPIDS

Volume contents

Volume 76 (1995)

R.H. Jones, I. Dey (Denver, CO; Philadelphia, PA) *Determining one or more change points* 1

D.E. Decker, S.M. Vroegop, T.G. Goodman, T. Peterson, S.E. Buxser (Kalamazoo, MI) *Kinetics and thermodynamics of emulsion delivery of lipophilic antioxidants to cells in culture* 7

A.D. Horowitz (Cincinnati, OH) *Exclusion of SP-C, but not SP-B, by gel phase palmitoyl lipids* 27

G.S. Attard, C. McGuigan, A. Mackenzie (Southampton, UK) *Phase behaviour of novel phospholipid analogues* 41

C. Sen-Varma, S. Ghosh, B.B. Bhowmik (Calcutta, India) *Photo-effect in phospholipid liposome containing riboflavin* 49

K.-H. Shin, T. Nagamori, Y. Kimura, M. Tomoi, T. Fujiwara, H. Akutsu (Yokohama, Japan) *Microdomain formation in phosphatidylethanolamine bilayers detected by ^2H-NMR* 55

M.A. Markowitz, D.B. Puranik, A. Singh (Washington, DC) *Monolayer study of mixtures of diacetylenic phosphatidylcholine and phospholipids containing metal-chelating iminodiacetic acid headgroup* 63

J.K. Woodford, S.M. Colles, S. Myers-Payne, J.T. Billheimer, F. Schroeder (TVMC College Station, TX; Wilmington, DE) *Sterol carrier protein-2 stimulates intermembrane sterol transfer by direct membrane interaction* 73

N. Borochov, E.J. Wachtel, D. Bach (Rehovot, Israel) *Phase behavior of mixtures of cholesterol and saturated phosphatidylglycerols* 85

W. Tsuzuki, S. Tsuzuki, K. Hayamizu, S. Kobayashi, T. Suzuki (Ibaraki, Japan) *Conformation analysis of glycerides by nuclear magnetic resonance* 93

L.C.M. van Gorkom, J.J. Cheetham, R.M. Epand (Hamilton, Ontario) *Ganglioside G_{D1a} generates domains of high curvature in phosphatidylethanolamine liposomes as determined by solid state ^{31}P-NMR spectroscopy* 103

Short communications

P. Villeneuve, M. Pina, D. Montet, J. Graille (Montpellier, France) *Determination of lipase specificities through the use of chiral triglycerides and their racemics* 109

H. Takahashi, S. Matuoka, Y. Amemiya, I. Hatta (Nagoya, Sappora, Tsukuba, Japan) *Simultaneous differential scanning calorimetry and time-resolved X-ray diffraction of lipid-water system. I. Relationship between chain melting and endothermic heat at the main transition of a dipalmitoylphosphatidylcholine-water system* 115

D. Bach, N. Borochov, E.J. Wachtel, M. Shinitzky (Rehovot, Israel) *Cholesteryl hemisuccinate-cholesterol interaction: miscibility properties of the sterols* 123

E.J. Parish, S.A. Kizito, J. Peng, R.W. Heidepriem, P. Livant (Alabama, GA) *A novel chemical synthesis and carbon-13 nuclear magnetic resonance spectral properties of cholest-4-ene-3,6-dione* 129

L. Li, L.X. Zheng, F.Y. Yang (Beijing, Peoples Republic of China) *Effect of propensity of hexagonal II phase formation on the activity of mitochondrial ubiquinol-cytochrome c reductase and H^+-ATPase* . . 135

G. Brezesinski, A. Dietrich, B. Struth, C. Böhm, W.G. Bouwman, K. Kjaer, H. Möhwald (Mainz, Berlin, Germany; Roskilde, Denmark) *Influence of ether linkages on the structure of double-chain phospholipid monolayers* 145

Y. Nibu, T. Inoue (Fukuoka, Japan) *Miscibility of binary phospholipid mixtures under hydrated and non-hydrated conditions. II. Phosphatidylethanolamines with different acyl chain length* 159
T. Inoue, Y. Nibu (Fukuoka, Japan) *Miscibility of binary phospholipid mixtures under hydrated and non-hydrated conditions. III. Reinvestigation of phosphatidic acids with different acyl chain length* 171
T. Inoue, Y. Nibu (Fukuoka, Japan) *Miscibility of binary phospholipid mixtures under hydrated and non-hydrated conditions. IV. Phosphatidylglycerols with different acyl chain length*. 181
G.C. Kresheck, J. Hwang (DeKalb, IL) *Phase separation properties of several aqueous alkyldimethylphosphine oxide/phopsholipid mixtures and their potential use for protein purification*. 193
R. Sacchi, I. Medina, L. Paolillo (Portici, Naples, Italy; Vigo, Spain) *One- and two-dimensional NMR studies of plasmalogens (alk-1-enyl-phosphatidylethanolamine)* 201
U. Massing, H. Eibl (Göttingen, Germany) *New optically pure dimethylacetals of glyceraldehydes and their application for lipid and phospholipid synthesis* 211
A.Y. Zamyatina, V.I. Shvets (Moscow, Russian Federation) *The synthesis of 1-O-(2-N-stearoyl-D-erythro-sphinganine-1-phosphoryl)-2-O-(α-D-mannopyranosyl-D-myo-inositol: a fragment of the naturally occurring inositol-containing glycophosphosphingolipids*. 225
J. Simon, M. Kühner, H. Ringsdorf, E. Sackmann (Garching, Mainz, Germany) *Polymer-induced shape changes and capping in giant liposomes* 241
R. Felde, G. Spiteller (Bayreuth, Germany) *Plasmalogen oxidation in human serum lipoproteins* 259

Book Review. 269
